

Seljord Stories

International workshop in Seljord 25th september - 4th October 2009

Students of Politecnico di Milano and Norwegian Theatre Academy from Østfold University College will design and construct three projects around the Seljord lake during a ten day workshop.

The result will be three public functional site-specific wooden pieces of architecture commenting on the local nature, culture and myths.

The workshop is:

- supported by Ministry of Local Government and Regional Development, Telemark County, Seljord Næringslag and Seljord municipality,
- organized by Feste landskapsarkitekter og Springer kulturstudio.
- lead by Dagur Eggertsson and Sami Rintala

Opening of the works on Saturday 3.10.

All welcome to experience and use next generation architecture in a mythical landscape.
